

## Welcome

We started a new initiative with our newsletter's publication where you can find every two months the latest news of **INVAR** world, engineering and vision systems.

## News

### Road Safety

Last September we completed the first program of Road Safety Auditors 2013, organized by the General Directorate of Highways, Ministry of Public Works and Highways of Spain.

This is the first step necessary to receive official accreditation as road safety auditors, as established in Directive 2008/96/CE, of the European Parliament and the Council on road infrastructure safety management.

### New Equipment

We recently acquired a micro-camera (on PCB) with 2.4 grams, measures 25 x 20 x 9 mm with CMOS sensor and a resolution of 5 megapixel (2592 x 1944) that allows 1080p/720p recordings with 30/60 fps frequency.

### INVAR SAAT

**INVAR** has developed during last months, an autonomous system portable system to record highway traffic imaging.

## Events

### TRAFIC 2013

From 15th to 18th of October we visited at IFEMA (Madrid), the International Road Safety and Road Equipment Exhibition, where a hundred companies from 11 countries presented the latest advances in lighting, horizontal and vertical road signs, safety barriers, parking management and equipment,...

### CUMBRE 2013

From 1st to 4th of October we visited the Industrial and Technology Summit at Bilbao Exhibition Center (BEC). An initiative designed with the aim to act as an engine of industrial development and technological sectors, providing a single space to all areas of interest in manufacturing processes.

### 2nd Innovation Conference

We attended the 2nd Innovation Conference dedicated to the production systems.

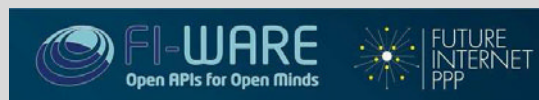

There were analyzed innovative actions needed to be more competitive, simplify the application and deployment of global models Management or Supply Chain Lean Manufacturing and their associated concepts.

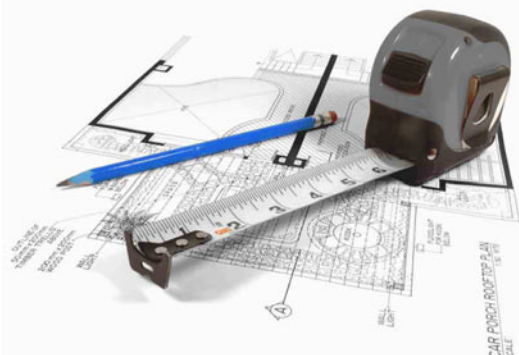

### Santander FI-WARE

From 16th to 18th of October the FI-WARE and FI-Lab conference has been held in the city of Santander.

The main objective of the event is to facilitate the learning of FI-WARE platform to Spanish SMEs, in order to increase the probability of success in the Future Internet Public Private Partnership and the Horizon 2020 Programme.

## Have you got a project? We help you

Send us your idea, your project. We can analyze and study the possibilities. We offer you our research and technological development (R & TD) laboratory.

Vision System chances of and its applications are wide enough.

Contact us for more information, our professionals will attend you.
